# Volcanoes

*For the time where you are not at school, here are some ideas of things you could be doing at home linked to our geography topic:*

- *Research volcanoes all over the world. Are any erupting right now? Which one is the closest to you? Is it active, dormant or extinct?*
- *Imagine you are a Volcanologist, write a letter to someone explaining your area of science and what you do daily.*
- *Get creative with some writing and show off to your family with Alan Peat skills! You could be trapped inside a volcano, you could go on an adventure to the inner core of the Earth, use your own incredible imagination!*
- *Like we did in class, create volcanoes Top Trump cards. This will be a fun game to play with your family after too!*

*We will be looking at the Science topic 'Light' and the Artist 'Lowry'.*

*Science – Explore with light at home using torches to make shadows. What happens to the shadow when the light source gets closer/further away?*

*Art – Research Lowry and try to recreate some of his work. Can you find out any facts about him?*
